title scramjet propulsion progress
pdf - In the 2000s, significant
progress was made in the
development of hypersonic
technology, particularly in the
field of scramjet engines.. The
HyShot project demonstrated
scramjet combustion on July 30,
2002. Scramjet - Wikipedia -
Laser propulsion is a form of
beam-powered propulsion where
the energy source is a remote
(usually ground-based) laser
system and separate from the
reaction mass. This form of
propulsion differs from a
conventional chemical rocket
where both energy and reaction
mass come from the solid or
liquid propellants carried on
board the vehicle. Laser
propulsion - Wikipedia -
